講演要旨

Football is the most popular sport in the UK where the first modern set of rules were established in 1863; these were a major influence on the development of the modern laws of the game. With over 40,000 association football clubs, the UK has more football clubs than any other country. What effect does this have on the national psyche and liberalism in the UK? Please come along, find out and compare this to Japan. There are several Japanese internationals in the men's and women's clubs in the UK.
